

Sublette County, Wyoming

Alertsense Information System

Sublette County has moved to a computer-generated mass notification system. The following information requested will be imputed into the program so when your select group needs to receive a notification, you will be included. If you do not have a home phone or do not want one used for the system, do not list it. **Prioritize your information in the order you wish to be notified and list what each number is:** ex: home phone, text, cell phone, e-mail, pager. You may list more than one cell number, just add defining title.

***** Remember to listen to the options of how to correctly respond when these notifications are sent. *****
